

2.1

A clean and modern Weather Dashboard application. Users can search for any city to instantly view the current weather details, including temperature, humidity, and wind speed—as well as a complete 5-day forecast. The interface also keeps track of recent searches for quick access.

2.2

A GitHub Repository Finder built to search and explore projects on GitHub. Users can enter a search term, sort the results by criteria like stars, and view a list of matching repositories with their descriptions, star counts, and fork counts.

The image shows two screenshots of a web-based GitHub repository search application. Both screenshots are identical, featuring a dark-themed interface with a search bar and a list of repositories.
